Drive V is an amzing mod by the talented PermissionToLand. The incredible result of his 5 years and over 2,000 hours of learning the physics system to create the mod we all know and love.

Realistic Car Damage With Better Deformation For DLC Vehicles is a mod created by Wolvex(R) with the intention of increase car deformation, slightly increase engine damage and making car parts like bumpers and fenders detach faster.

However these mods and other mods that edit driving physics and deformation values are simply incompatible with eachother and have had me picking between them for years.

i have subsecuncely decided to create an addon package for Drive V raising the deformation limits and damage values so we no longer have to choose between driving physics or car deformation.

Features

- Realistic engine damage
- Realistic Crashes
- Increased Deformation limits for all DriveV veichle edits
- More easily detach bumpers
- Wheel Destruction
- Roof and cabin Deformation With ENB

Instaltion

- Install Drive V
